

Connecting our *values* to the way we approach access and pricing decisions

AgiOS is a biopharmaceutical company that is fueled by connections.

The Agios team cultivates strong bonds with patient communities, healthcare professionals, partners and colleagues to discover, develop and deliver therapies for genetically defined diseases. Building on the company's leadership in the field of cellular metabolism, Agios is advancing a robust pipeline of investigational medicines, including a first-in-class pyruvate kinase (PK) activator that is being evaluated for the treatment of three distinct hemolytic anemias – pyruvate kinase (PK) deficiency, alpha- and beta-thalassemia and sickle cell disease.

Our philosophy on access & pricing

At Agios, we forge deep connections with patients, providers, policymakers, and payers to better meet the needs of people living with genetically defined diseases.

Our commitment begins with discovering, developing and delivering transformative medicines that address patients' needs. We build on this commitment by supporting patients throughout their journeys. We provide and participate in programs that increase awareness, support accurate and timely diagnosis, and enable access to safe and effective treatments.

We pledge to set prices for our medicines that balance the benefits to patients, caregivers, the healthcare system and society and allow us to help as many people as possible today while investing in innovation to help even more people tomorrow.

The principles that guide us

Create meaningful outcomes for patients.

We work tirelessly to understand genetically defined diseases, so we can develop medicines that help address the outcomes that are most important to people living with these diseases.

Stay connected with communities.

We connect directly with patients, caregivers, advocates, providers, payers, and policymakers and are invested in collaborating with them to develop new and better solutions.

Emphasize transparency.

We connect stakeholders with the information they need by sharing our data, values, processes, and progress as openly as possible.

Ensure sustainability to help more patients.

We invest in innovation to help more patient communities, while ensuring we continue to serve the patients of today.
